

Dear Baobab Insurance Team,

As a senior full-stack engineer with 11+ years in product-driven SaaS, my core stack (React, TypeScript, Node.js, AWS) is an excellent match for your needs. I have end-to-end feature ownership experience across frontend, backend, and infrastructure.

I've worked as both a senior and lead engineer in fast-moving startups, delivering production features, refactoring systems, and collaborating with stakeholders. I thrive with ownership, ambiguity, and fast-paced work without sacrificing quality.

I am eager to bring my technical expertise and startup mindset to Baobab's product.

Best regards,

Vlad Palii
